# Alexa Skill 'fit bleiben'

## Bespoken

Using [Bespoken](#) for Alexa Skill testing. Runing Lambda function local.

```
$ bst proxy lambda index.js
```

Starting lambda fuction local.

## ASK CLI

Ask cli is used to be able to configer the skill local and be able to deploy in to the alexa development console.

### 1. Install ASK Cli

[Via Npm](#)

Installation creates necessary folder within the intents und utterances to be able to test the skill via Bespoken.

### 2. Add DynamoDB

[Adding Dynamo DB](#)

[Adding Dynamo DB](#)

### 3. Installed Phyton to install aws cli FUCK OFF THAT SHIT USE BREW

why is this explained on the docu????????? I need to create an aws credential file with the aws cli [Install PHYTON](#)

```
brew install awscli
```
